

New construction Tropenhaus Frutigen

Tropenhaus takes a leading role in the utilization of renewable energies in the Alpine region. It breeds fish and cultivates fruit and as a model operation, it is the competency centre for experiencing with all senses the topics and services connected with it.

Construction activities, which were managed by Emch+Berger:

1st phase: New construction of Tropenhaus Frutigen consisting of the fish farm and fish processing plant, greenhouse, restaurant, exhibition and visitor tour

2nd phase: New construction of the tank system D/E, optimization and adaptations to the existing circulatory system, realization of the farm
