Emch+Berger Group

Short profile

Global solutions are our strength.

Design, consulting and management

Who we are

Comprehensive know-how and many years of experience

Since 1953, we have been providing our clients with design, consulting and project management services for all phases of their construction projects, covering infrastructure, real estate, structural engineering, surveying, energy & environment and mobility & traffic.

In your area

With over 800 employees, including 60 apprentices, we are present at more than 30 locations, ensuring we remain close to our customers.

Complete solutions for your needs

We aspire to develop innovative, sustainable, overall solutions in house, which are optimised both technically and economically for our customers. A key part of this is how our experts cooperate intensively and across the company for and with you.

A committed team

You can count on our employees' enthusiasm, commitment and responsibility. You will benefit from interdisciplinary teams, up-to-date knowledge, expertise and a network of contacts throughout Switzerland.

Our company entirely belongs to our employees, meaning we're independent and committed to excellence each and every day.

Our management system is ISO 9001 certified.

Our activities

Infrastructure

Civil engineering structures, road engineering, underground construction / geotechnics, rail infrastructure, regional development & urban planning, supply & waste management, safety, telecommunications, client support services, community engineering

Real estate

Construction fiduciary & project management, real estate consulting, integrated design & management, construction management, property & facility management, MEP & sustainability consulting, cost consulting, quality assurance

Structural engineering

Structural design, fire protection, earthquake proofing & vibrations, condition analysis, groundworks engineering and special foundation engineering

Energy and environment

Energy production, district heating and cooling, energy efficiency, water and river engineering, renaturation and revitalisation, recycling & sustainability, natural hazards, environmental sustainability, noise protection

Mobility and traffic

Transport planning, mobility management, public transport, traffic models / simulations, transport management / transport technology, rail systems & traffic management systems, rail vehicles, safety / RAMS, road safety (ISSI)

Surveying

Construction and engineering surveying, photogrammetry, laserscanning, geomonitoring, official cadastral survey, geoinformatics, land management

Our Services

Consulting and fiduciary services

- Fiduciary construction services, client representation and support
- Site supervision
- Studies, expertise, strategic planning, site and project development
- Condition analysis, due diligence
- Competitions, submissions, processes, communication

Design and management

- Integrated design and management
- General management, project management
- Planning, specialist planning
- Cost, timeline and quality management
- Construction supervision, construction management, construction logistics
- Measuring condition, monitoring
- Controlling and optimisation
- Ecological, social and economic sustainability
- Hydraulics
- Earthquake protection
- Tenant improvements
- Community engineering
- Safety and rescue concepts, risk analyses, RAMS, Emergency plans, Infrastructure safety (RSA, RSI, RIA, BSM, NSB, EUM)
- Building Information Modelling (BIM)

Cost consulting

- Cost planning, cost optimisation, life-cycle costs
- Cost management
